| THE CALL FOR BETTER CODING

Improperly coded medical claims increase costs, decrease reimbursement and impact cash flow. Nearly 30% of all medical claims are improperly coded, incomplete or have technical errors. These challenges are compounded by a growing shortage of trained coders and billers. Most of the coding systems embedded in EHR software fall short on depth of function, perpetuating coding errors and increasing pended claims.

| THE CONTEXT SOLUTION: CODELINK® ONLINE

Developed with coders in mind, CodeLink Online advanced medical coding software generates CPT and ICD code data to expedite claim submission and minimize denials. CodeLink Online is the #1 preferred coding solution for medium to large coding organizations due to its intuitive user interface, licensing model, and easy cloud-based access. It is purposely organized to look and feel like familiar coding manuals yet provide advanced software features to speed up your job.

FULLY CLOUD-BASED

All of the features of CodeLink Online are cloud-based. That means there is no installation needed on your system, and there are no updates that you have to manage. Your users simply access their user account, and they're productive.

POWERFUL CODE SEARCH

CodeLink Online allows users to perform fast and accurate CPT, HCPCS, ICD-10-CM, and ICD-10-PCS code searches by the code, a keyword, or a modifier. The users can assign custom keywords or frequently used codes to make access even quicker.

CPT	ICD10 DX	CPT Index	ICD DX Index	ICD Proc	ICD Proc Index	Print Form	SuperBill	Bill Editing

magnetic resonance		Search	147 Codes Returned for 'magnetic resonance'

Markers	Code	AMA Long Description
◆ 🖼	70540	Magnetic resonance (eg, proton) imaging, orbit, face, and/or neck; without contrast material(s)
	70541	See 70544-70546, 70547-70549 {Magnetic resonance angiography, head and/or neck, with or without contrast material(s)}
◆ 🖼	70542	Magnetic resonance (eg, proton) imaging, orbit, face, and/or neck; with contrast material(s)
◆ 🖼	70543	Magnetic resonance (eg, proton) imaging, orbit, face, and/or neck; without contrast material(s), followed by contrast material(s) and further sequences
◆ 🖼	70544	Magnetic resonance angiography, head; without contrast material(s)
◆ 🖼	70545	Magnetic resonance angiography, head; with contrast material(s)
◆ 🖼	70546	Magnetic resonance angiography, head; without contrast material(s), followed by contrast material(s) and further sequences

EXTENSIVE CODE INFORMATION

It's hard to code a bill properly without information. CodeLink Online provides the user with an array of reference information about the codes all in one screen.

At your fingertips, you'll see::

- Detailed descriptions of each code
- The complete AMA rules and notes
- Medicare rules and modifier information
- Medical necessity
- Full Medicare physician fee schedule pricing
- Dental and Anesthesia crosswalks

Coding Rules for 31615
For tracheoscopy, see laryngoscopy codes 31515-31574.

For bronchoscopy with endobronchial ultrasound (EBUS) guided transtracheal/transbronchial sampling of mediastinal and/or hilar lymph node stations or structures, see 31652, 31653. For transendoscopic ultrasound during bronchoscopic diagnostic or therapeutic intervention(s) for peripheral lesion(s), use 31654.

For endoscopy procedures, code appropriate endoscopy of each anatomic site examined. Surgical bronchoscopy always includes diagnostic bronchoscopy when performed by the same physician. Codes 31622-31651, 31660, 31661 include fluoroscopic guidance, when performed.

Codes 31652 and 31653 are complete services used for sampling (eg, aspiration/biopsy) lymph node(s) or adjacent structure(s) utilizing endobronchial ultrasound (EBUS) and are reported separately. Code 31654 is an add-on code and should be reported for identifying one or more peripheral lesion(s) with transendoscopic ultrasound.

Surgery Guidelines

Guidelines to direct general reporting of services are presented in the Introduction. Some of the commonalities are repeated here for the convenience of those referring to this section on Surgery. Other definitions and items unique to Surgery are also listed.

Services

Services rendered in the office, home, or hospital, consultations, and other medical services are listed in the Evaluation and Management Services section (99201-99499). "Special Services, Procedures and Reports" (99000-99082) are listed in the Medicine section.

COMPREHENSIVE CODE INDEXES

CodeLink Online maintains a comprehensive set of indexes for each type of code.

This allows you to search for codes using both primary references for the code, or secondary preferences that will help you zero in on the right code for the service or diagnosis. And you still have access to the powerful keyword searches to ensure you have the right code.

FAST, ACCURATE, BILL EDITING

To avoid claim denials, you have to send out claims that are accurate the first time. CodeLink Online allows you to do just that by leveraging some of Context's Payment Integrity solution to edit your bill before it goes out.

You'll be able to subject your bill to the following powerful edit rules:

- CCI and MUE for both Medicare and Medicaid

- Context's proprietary procedure/ diagnosis crosswalk, which will alert you to when a coded procedure and diagnosis are typically incompatible
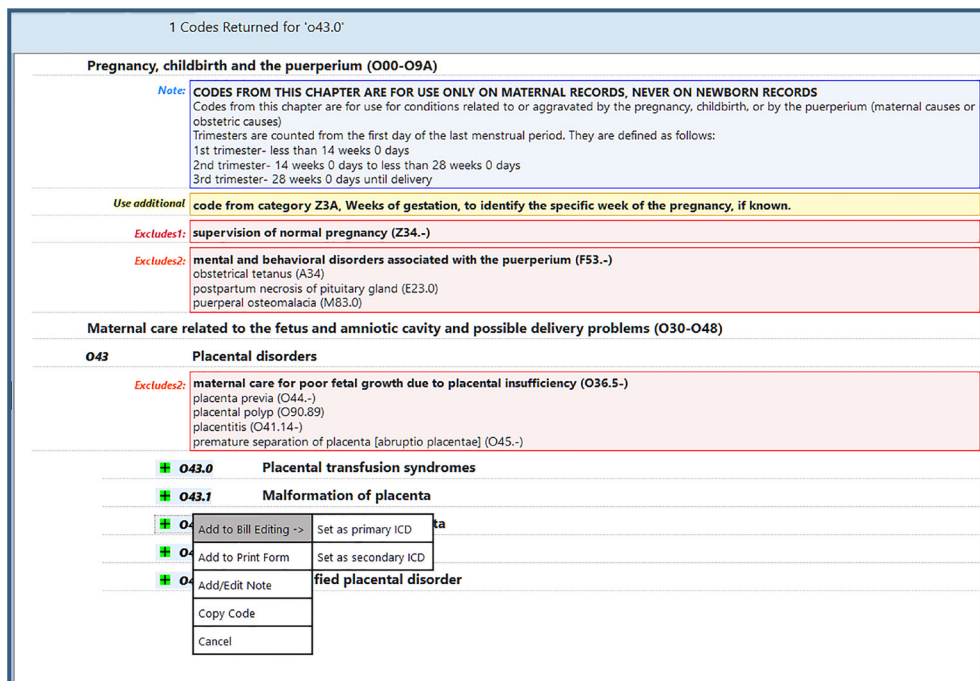

- Appropriate modifier usage

- Medical necessity

- LCD/NCD compliance check for local and national coverage guidelines

- Weekly updates to the SaaS rules! You're always in compliance when using the Bill Editing in CodeLink Online

AUTOMATIC CODE INFORMATION DISPLAYS

CodeLink Online is filled with more than 20 visible symbols and icons that are automatically visible to you to put the codes you're looking at into context.

The symbol legend pops up when hovering over it, so there's no need to remember them all.

There are built-in notes, warnings and effective date information about all the codes which will automatically pop up to make sure you're fully informed about the codes you're thinking of using.

FULL FEATURED NOTE MANAGER

We know that accurate billing isn't just about picking the right codes. To make sure you get fast and accurate payment from the payer, you have to include as much information as possible about the interaction. That's where CodeLink Online's Note Manager comes in.

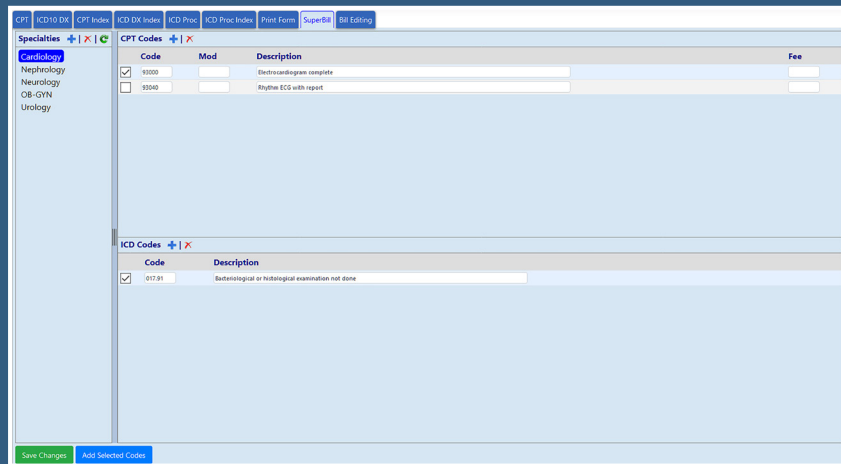

With the Note Manager, you can quickly add notes about any code to provide detail about the services. The notes can be shared with other CodeLink Online users within your organization. They can also be transferred to and from CodeLink Online through import and export features.

CREATE BILLS EASILY

CodeLink Online has convenient features that will allow you to easily and efficiently create bills or coding summaries. With a few clicks you can save your frequently used codes to either a SuperBill or bill Print Form.

This can be done by provider specialty so you can support multiple provider clients with prebuilt bills. When done, you can combine the codes and modifiers with the patient summary into a single document.

YOU'RE ALWAYS UP TO DATE WITH CODELINK ONLINE

You can't ensure accurate coding and reduced denials if your coding software isn't up to date. CodeLink Online keeps you in compliance through regular updates:

- **Bill editing rules are updated weekly.** This is necessary because of the frequent nature of changes to LCDs, NCDs, CCI edits, and other regulatory requirements. CodeLink Online links to these rules in the cloud, so there's no disruption to you or your staff for these frequent updates.

- **Code databases are updated quarterly.** Any less than that, and you're out of compliance. The AMA and CMS update codes quarterly, so we make sure you've got them too.

CodeLink Online is the most advanced and accurate solution for medical coding available today. Contact Context[4] Healthcare to find out how you can get on board.
